Councilmember Kansen Chu, District 4
San Jose Redevelopment Agency
Warren East, Chief Executive Officer, ARM
Simon Segers, Executive Vice President, ARM

Background: ARM [(LSE: ARM); (Nasdaq: ARMH)], the world's leading semiconductor Intellectual Property (IP) supplier relocated early this year from Sunnyvale to North San Jose. The San Jose Redevelopment Agency and the City of San José helped facilitate the relocation by providing an expedited plan review process through the City's Special Tenant Improvement (STI) Program. The company has invested nearly \$9 million in tenant improvements and other related costs towards its new 92,000 square feet facility.

Established in 1990, ARM designs the technology that lies at the heart of advanced digital products from wireless, networking and consumer entertainment solutions, to imaging, automotive, security and storage devices. ARM's comprehensive product offering includes 32-bit RISC microprocessors, graphics processors, video engines, enabling software, cell libraries, embedded memories, high-speed connectivity products, peripherals and development tools. Combined with comprehensive design services, training, support and maintenance, and the company's broad Partner community, ARM provides a total system solution that offers a fast, reliable path to market for leading electronics companies.

-more-

With more than 30 offices located throughout Europe, North America and Asia, the company currently employs more than 1,700 employees worldwide, of which 280 employees are located in San José. ARM has built a base of nearly 600 processor licenses and recently announced the shipment of its 10 billionth processor. For more information, visit www.arm.com.

The San Jose Redevelopment Agency has invested more than \$170 million in infrastructure improvements in North San Jose's Innovation Triangle, Rincon de Los Esteros, including Route 87 improvements, flood control, the Brokaw Road – U.S. 101 undercrossing and Tasman Bridges. The Innovation Triangle consists of more than 4,600 acres, 42 million square feet of built office and industrial space and is home to more than 1,400 of the world's best known international and multinational technology companies, employing over 56,000 people.
